

OLA Lubix XHP Series

High performance lithium complex greases

Features and benefits:

- High equipment protection and potential equipment life extension even in severe operating conditions
- Ensures proper lubrication and protection even in wetlands
- Excellent low temperature pumpability and start-up performance
- Extension of re-lubrication intervals

Applications:

OLA Lubix XHP 100,220,320,320 Moly and 460 are recommended for severe industrial applications and on and off highway applications (quarrying, construction, transport, mining, agriculture) in terms of operational severity and water spray. Specific applications include:

- Bucket pins, pivot pins, and heavily loaded chassis components.
- Heavy equipment central lubrication systems
- General purpose chassis and bearing lubrication.

Health and safety:

This product used as our recommendation for intended application not expected to produce any particular risk. A safety data sheet of this product is available for a simple request from your sales contact office or via internet. In case of used oil elimination, please respect the regulation and protect the environment.

Description:

OLA Lubix XHP Series are premium greases specifically designed to meet the needs of industrial segments such as construction, off and on highway and mining equipment requiring exceptional extreme pressure/anti-wear performance and remaining in place even in tough conditions of water spray, high sliding and high temperatures. OLA Lubix XHP greases are especially suited for heavy equipment in off and on-highway and mining sectors.
